

How to Use ChatGPT to Build Your Agentic AI Teammates

Day 1 Workshop

Facilitated by **Joe DiDonato**

How to Use ChatGPT to Build Your Agentic AI Teammates

A Hands-On Workshop for Business Professionals

What We'll Cover Today

01

AI Fundamentals

How AI works and why it matters

02

Prompting

Communicating effectively with AI

03

AI Teammates

Building your first custom assistant

04

Custom GPTs

Using OpenAI's GPT Builder

05

Practical Use Cases

Real business applications

Facilitated By

| Joe DiDonato

This workshop is designed for business professionals who want to harness the power of AI — no coding required.

What You'll Accomplish Today

By the end of today's workshop, you will have the knowledge and hands-on experience to immediately apply AI in your work.

Understand AI

Learn how AI works at a practical level

Communicate with AI

Learn how to talk to AI effectively

Create Prompts

Build effective, targeted prompts

Build an AI Teammate

Create your first custom AI assistant

Use GPT Builder

Navigate OpenAI's GPT Builder tool

Legal Contract Creator

Build a real, useful AI assistant

✓ "You do not need to know coding to build useful AI teammates."

Why AI Matters

AI is fundamentally changing how businesses operate across every department and function.

AI Is Changing These Fields

- Learning & Development
- Sales
- HR
- Marketing
- Customer Service
- Operations

The Shift in Training

Old Model

"One-size-fits-all training"

New Model

"Train only the skill gaps."

Discussion Question: How could AI help your current role?

The New Way to Think About AI

AI is not just software — it can become a true teammate

Coach

Guides you through decisions and skill development

Assistant

Handles tasks, drafts, and follow-ups efficiently

Researcher

Finds, synthesizes, and summarizes information

Writer

Creates content, copy, and communications

Trainer

Delivers personalized learning experiences

Brainstorming Partner

Generates ideas and explores possibilities

"The better you guide AI, the better teammate it becomes."

Step 1: Access ChatGPT

Create your account and get ready to build

Instructor Note: Pause here until most learners complete setup.

Setup Instructions

1

Create an Account

Sign up at chatgpt.com

2

Verify Your Email

Check your inbox and confirm

3

Upgrade to ChatGPT Plus

Required for GPT Builder access

4

Return to the Workshop

You're ready to build!

What is ChatGPT?

ChatGPT is an AI system that:

→ **Understands Language**

Processes natural human text and speech

→ **Responds Conversationally**

Engages in back-and-forth dialogue

→ **Generates Content**

Creates text, summaries, and documents

→ **Answers Questions**

Provides informed, contextual responses

→ **Helps Solve Problems**

Works through challenges step by step

GPT stands for:

Generative

Pre-trained

Transformer

Business Applications

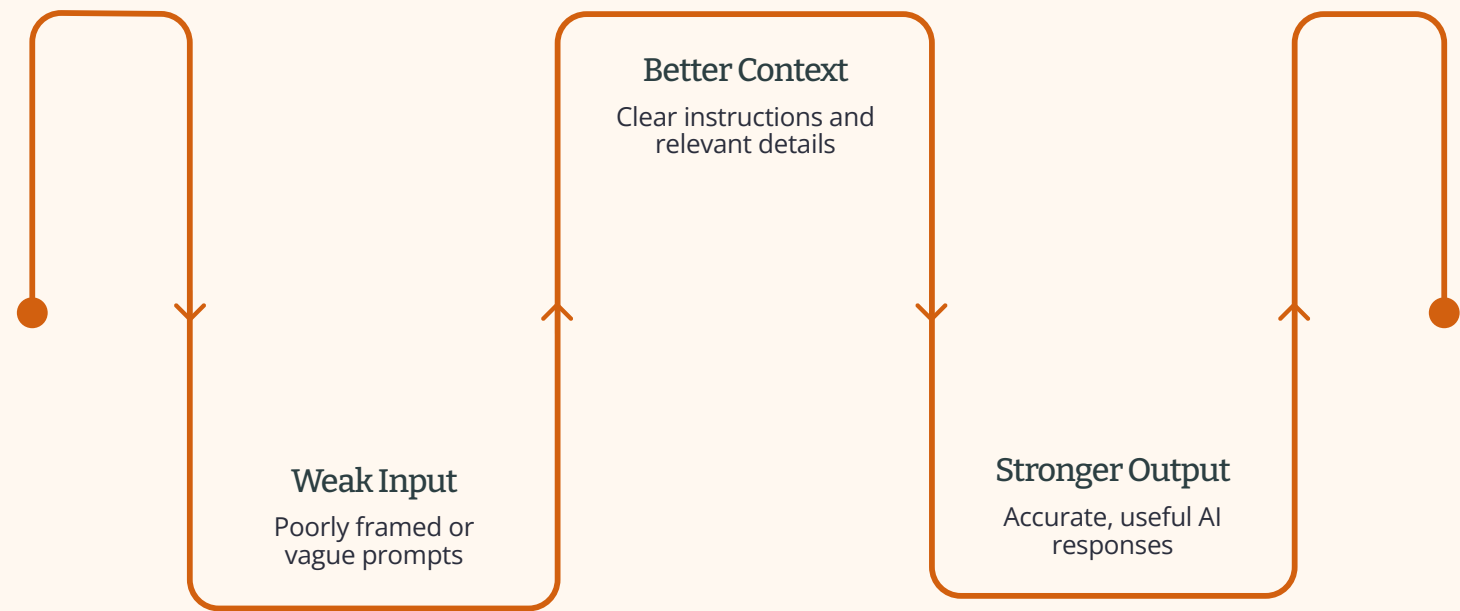

- Course creation
- Writing support
- Research
- Brainstorming
- Training support

Prompts Shape the Output

How AI responds depends entirely on how you communicate with it

AI responds based on your instructions, your wording, your context, and your examples. The quality of your input directly determines the quality of your output.

✗ Weak Prompt "Write a contract." Vague, no context, no audience, no purpose.	✓ Better Prompt "Create a simple independent contractor agreement for a graphic designer in Arizona." Specific, contextual, actionable.
--	--

The more specific and contextual your prompt, the more useful and accurate the AI's response will be.

✓ "Better prompts create better outputs."

Six Core Prompt Categories

Master these prompt types to unlock AI's full potential

1

Information Retrieval

Ask AI to find, explain, or clarify specific information on any topic

2

Summarization

Condense long documents, articles, or conversations into key points

3

Text Generation

Create original content — emails, reports, proposals, and more

4

Comparison

Evaluate options side by side to support better decision-making

5

Step-by-Step Instructions

Break down complex processes into clear, actionable steps

6

Translation

Convert content between languages or simplify complex language

  **Mini Exercise:** Write one prompt related to your current work using one of these six categories.

The Power of Personas

A persona tells AI who it should act like — and dramatically improves output quality

Example Persona Prompt

"You are an experienced business attorney specializing in small business contracts."

This single instruction transforms a generic AI response into expert-level legal guidance tailored to your needs.

✓ "Personas dramatically improve AI quality."

Persona Examples

Executive Coach

Strategic leadership and decision-making guidance

Negotiation Expert

Tactics, language, and deal-making strategies

L&D Consultant

Training design and learning strategy

HR Advisor

People management and policy guidance

Sales Trainer

Techniques, scripts, and closing strategies

Build Your First AI Teammate

Access the GPT Builder and get ready to create

Instructor Note: Pause until all learners reach the GPT Builder screen.

Backup Navigation

1

Open ChatGPT

Go to chatgpt.com and log in

2

Click "Explore GPTs"

Find it in the left sidebar menu

3

Click "Create"

This opens the GPT Builder interface

Your Personalized AI Teammate

What is a Custom GPT?

A Custom GPT Can:

Follow Instructions

Behaves exactly as you configure it

Maintain Personality

Consistent tone and communication style

Answer Questions

Responds within its defined expertise

Use Uploaded Knowledge

Reference your own documents and data

Specialize in Tasks

Focused on exactly what you need

Example Custom GPTs

Legal Assistant

Sales Coach

Writing Assistant

HR Advisor

L&D Coach

"Specialized AI teammates are more valuable than generic AI chats."

Build a Legal Contract Creator

Your First AI Teammate — Today's Project

In less than one hour, you will build a fully functional AI assistant that helps create real business legal documents.

NDAs

Non-disclosure agreements for protecting confidential information

Contractor Agreements

Independent contractor agreements for freelancers and vendors

Consulting Agreements

Formal agreements for consulting engagements and projects

Proposal Language

Professional language for business proposals and bids

Business Clauses

Standard clauses for a variety of business agreements

Goal: Create a useful, real-world business tool in less than one hour — no coding required.

Configure Your GPT

Define your AI teammate before you build it

What to Define

Name

Give your GPT a clear, descriptive name

Purpose

What specific task does it perform?

Audience

Who will use this AI teammate?

Personality & Tone

How should it communicate?

Rules & Responsibilities

What should it always or never do?

Suggested Personality

"Professional, organized, practical, and detail-oriented."

A well-defined personality ensures your AI teammate communicates consistently and appropriately for every user interaction.

The more clearly you define your GPT, the more reliably it will perform in real business situations.

Sample GPT Instructions

Example configuration for your Legal Contract Creator

Example Instructions

"You are a professional business contract assistant that helps business owners draft simple agreements in clear business language.

You help create:

- NDAs
- contractor agreements
- consulting agreements
- proposal language

Always:

- use clear language
- organize information professionally
- explain legal terms simply
- recommend legal review before final use."

Instructor Note: Walk learners through modifying the instructions for their own use case.

Why These Instructions Work

Clear Role Definition

The AI knows exactly what it is and what it does

Specific Deliverables

Lists exactly what documents it can create

Behavioral Rules

Always-on guidelines ensure consistent quality

Built-in Safety

Recommends legal review — responsible by design

Test Your AI Teammate

AI improves through testing and refinement

Once your GPT is configured, put it through its paces with these suggested test prompts. Observe how it responds and refine your instructions accordingly.

“

Test 1

"Create a simple NDA."

”

“

Test 2

"Draft a contractor agreement."

”

“

Test 3

"Rewrite this clause in simpler language."

”

“

Test 4

"Create a consulting agreement."

”

“

Test 5

"Summarize this legal paragraph."

”

✔ "AI improves through testing and refinement. The more you test, the better your teammate becomes."

Responsible AI Use

AI Safety and Governance

Critical Rule

Never place sensitive information into AI tools without explicit organizational approval.

This applies to all AI platforms, including ChatGPT, regardless of privacy settings.

Topics Requiring Caution

Confidential Data

Trade secrets, proprietary processes, internal strategies

Customer Information

PII, account details, purchase history

Employee Records

Performance data, compensation, personal details

Legal Review

AI-generated documents require attorney review before use

Human Oversight

Always maintain human judgment in final decisions

 "AI should assist humans — not replace judgment."

Other Things AI Can Help You Build

Creative Business Applications

Beyond legal contracts, AI can accelerate nearly every aspect of your business operations and creative work.

Course Outlines & Lesson Plans

Design training programs in minutes

Business Ideas

Brainstorm and validate new concepts

Social Media Posts

Create engaging content at scale

Branding Ideas

Develop brand voice, names, and messaging

Writing Support

Drafts, edits, and polished communications

Marketing Copy

Ads, emails, landing pages, and campaigns

Activity: Create one additional business-related AI use case relevant to your role.

Your Afternoon Project

Hands-On Workshop Assignment

Choose one of the following projects to build during the afternoon session. You will present your work to the group at the end of the day.

1

Improve Your Legal Contract Creator

Refine instructions, add more document types, and test edge cases

2

Build a Second AI Teammate

Create a completely new GPT for a different business function

3

Create a Writing Assistant

Build a GPT that helps with emails, reports, or proposals

4

Create a Training Assistant

Design a GPT that supports onboarding or skill development

5

Create a Business Coach

Build a strategic advisor GPT for leadership decisions

Deliverable: Prepare to demonstrate what it does, who it helps, example prompts, and expected business value.

Reflection Activity

Think About What You've Learned Today

💡 **What surprised you most?**

Reflect on the moments that challenged your assumptions about AI

⚡ **What could AI help you do immediately?**

Identify one task you could hand off to an AI teammate this week

🕒 **What AI teammate would save you the most time?**

Think about your biggest time drains and how AI could address them

😟 **What concerns do you still have?**

Identify questions or hesitations you want to explore further

✅ 💬 **Group Discussion:** Share one practical business use case you plan to implement using AI after today's workshop.
