

Using AI for Prospecting: Find, Research, Personalize, and Engage Better Leads

A practical course for sales professionals who want to use AI to improve prospecting quality, save time, and create more relevant outreach.

- ✔️ **Learner Outcome:** Build a reusable AI Prospecting Toolkit you can use in your real sales workflow.

Why This Course Matters

Prospecting is harder when buyers are busy, inboxes are crowded, and generic outreach is easy to ignore.

Research Faster

Summarize account and contact information in seconds

Prioritize Better

Identify better-fit prospects before you invest time

Relevant Outreach

Create messages that feel specific and timely

Practice Calls

Rehearse conversations before going live

Stay Consistent

Improve consistency across the entire workflow

Key Principle: AI should make prospecting more *useful*, not more automated.

What AI Will Do in This Course

In this course, AI acts as your always-available partner across every stage of the prospecting workflow.

Research Assistant

Summarizes account and contact information quickly and clearly.

Account Analyst

Connects account context to possible business issues and opportunities.

Writing Assistant

Drafts concise, relevant outreach tailored to your prospect.

Messaging Reviewer

Flags generic, unsupported, or automated-sounding language.

Role-Play Partner

Acts as a skeptical prospect or discovery practice partner.

Sales Coach

Gives feedback and helps you continuously improve your approach.

What AI Should *Not* Do

AI should not replace your judgment. The seller remains responsible for every message sent and every claim made.

⊗ **Seller Responsibility:** You own accuracy, tone, ethics, and relevance — always.

Avoid using AI to:

- Invent facts about a prospect
- Fake familiarity or false rapport
- Scrape or misuse private data
- Send mass messages without review
- Pretend a message is personalized when it is not
- Pressure prospects with misleading claims

The Golden Rule

Every AI-generated output is a **draft**, not a final product. Your expertise, judgment, and ethical standards are what make outreach trustworthy. Ask yourself before sending:

- Is this accurate?
- Is this relevant?
- Would I be comfortable if the prospect knew AI helped write this?

The Modern Prospecting Mindset

✗ Old Mindset

"How many people can I contact?"

✓ Modern Mindset

"Which prospects are most relevant, and how can I start a **useful conversation**?"

Strong Prospecting Combines:

01

Clear targeting

02

Relevant research

03

Specific messaging

04

Consistent follow-up

05

Practice and improvement

AI helps you move faster, but **better judgment** creates better outreach.

Prospecting Quality Over Activity Alone

More activity is not always better activity. A high-quality prospecting workflow demands honest answers to six critical questions before you reach out.

1

Account Fit

Is this account a good fit for our solution?

2

Timing

Why might this matter to them right now?

3

Right Person

Who is the right person to contact?

4

Business Issue

What business issue might they care about?

5

Relevant Message

What message would feel relevant and timely?

6

Next Step

What should I ask or propose next?

AI Practice: Use AI to pressure-test your answers to all six questions before sending any outreach.

AI Prompt

Prospecting Mindset Coach

Copy this prompt and paste it directly into your AI tool to get personalized coaching on your prospecting approach.

The Prompt:

"Act as a sales enablement coach. I want to improve my prospecting quality without sounding generic or automated.

My target market is: [insert target market].

My current prospecting challenge is: [insert challenge].

My sales motion is: [outbound, inbound follow-up, account-based, referral-based, etc.].

Help me identify:

1. Where AI can save time
2. Where I should not rely fully on AI
3. What information I need before outreach
4. What good personalization should look like
5. Three habits that would improve my prospecting consistency."

Real-World Scenario: The Generic Outreach Problem

Situation

A BDR sends 50 emails per day. Each message includes a company name and job title — but most emails sound exactly the same.

Challenge

The outreach uses personalization fields, but it does not show real relevance. Fields ≠ personalization.

AI-Supported Action

The BDR uses AI as a messaging reviewer to identify weak spots before sending.

What the AI Messaging Reviewer Flags:

-  Generic phrases
-  Weak assumptions
-  Seller-centered language
-  Missing prospect relevance

Lesson: AI can scale weak outreach, or it can help improve quality. The difference is entirely in how you use it.

Defining Your Ideal Customer Profile (ICP)

An ideal customer profile describes the type of company most likely to benefit from your solution. A strong ICP is the foundation of all effective prospecting.

💡 **AI Use:** Ask AI to organize your ICP framework — but always validate it with real sales experience and customer evidence. Your best customers are the best source of truth.

Why ICP Matters

Without a clear ICP, you waste time on accounts that will never buy. With one, every prospecting decision becomes faster and more confident.

AI Prompt

ICP Builder

Use this prompt to build a structured, actionable Ideal Customer Profile for your territory or product line.

The Prompt:

"Act as a sales strategist. Help me define an ideal customer profile for prospecting.

Our product/service: [describe product or service]

Best-fit customers usually: [list known traits]

Poor-fit customers usually: [list poor-fit traits]

Target market: [industry, company size, geography, or segment]

Create:

1. A clear ICP
2. Firmographic criteria
3. Business pain indicators
4. Buying trigger events
5. Disqualification signals
6. Priority buyer personas
7. Questions to verify fit before outreach."

Buyer Personas with AI

A buyer persona describes the specific person involved in the buying decision — their world, their pressures, and what they care about most.

Role & Goals

Responsibilities, business goals, and the metrics they are measured against day to day.

Pain Points

Current frustrations, internal pressures, and the problems keeping them up at night.

Decision Criteria

What they evaluate in a vendor, common objections, and how they justify a purchase.

Language & Metrics

The specific words, phrases, and KPIs this buyer uses when talking about their work.

AI Use: Ask AI to create a draft persona, then refine it using your real buyer conversations. Real data always beats AI assumptions.

AI Prompt

Buyer Persona Builder

Build a detailed, actionable buyer persona for any role in your target market. Refine the output with real buyer insights.

The Prompt:

"Act as a B2B sales enablement strategist. Build a buyer persona for this role:

Buyer role: [insert role]

Product/service: [insert product/service]

Target company type: [insert company type]

Create:

1. Primary responsibilities
2. Business goals
3. Likely pain points
4. Common objections
5. What this buyer cares about in a vendor
6. Messaging themes that may resonate
7. Discovery questions I could ask
8. Phrases or language this buyer might use."

Practice Activity: Build Your Targeting Foundation

Apply everything from this section to create the core targeting assets you will use throughout the rest of this course — and in your real sales workflow.

Your Deliverables:

01

One ICP Summary

Define the company type most likely to benefit from your solution.

02

Two Buyer Personas

Describe the key roles involved in your typical buying decision.

03

Five Buying Triggers

List the events or signals that indicate a prospect may be ready to buy.

04

Five Disqualification Signals

Identify the signs that an account is not worth your time.

05

Three Fit-Verification Questions

Questions you can ask early to confirm an account is worth pursuing.

 **AI Practice:** Use the ICP Builder and Buyer Persona Builder prompts from this section to generate your first drafts.

 **Reflection:** What type of prospect should you stop spending time on?

 **Business Application:** Turn your ICP into targeting rules for prospect lists, CRM filters, or territory planning.

Find, Prioritize, Research, and Personalize

Section 2 — A practical framework for identifying the right prospects, conducting meaningful research, and crafting outreach that earns a response.

SALES PROSPECTING PLAYBOOK

Finding and Prioritizing Prospects

Not all prospects deserve the same level of effort. Prioritize based on the signals that matter most:

→ ICP Fit

How closely does this account match your ideal customer profile?

→ Timing Signal

Is there a trigger event or urgency indicator present?

→ Role Relevance

Is the contact a relevant buyer persona with decision influence?

→ Likelihood of Conversation

Does existing relationship or context make engagement more likely?

Additional Priority Factors

- Possible business need
- Account value
- Trigger events
- Existing relationship

 **Sales Principle:** Do not treat every lead equally.

AI Use: Use AI to compare prospects against your ICP and identify where more research is needed.

Simple Prospect Priority Model

Use a **three-level model** to focus your energy where it matters most. Prioritization should improve focus, not create false certainty.

High Priority

Strong ICP fit, clear trigger, relevant buyer, timely reason to engage.

Medium Priority

Some fit, possible need, but missing research or unclear timing.

Low Priority

Weak fit, poor timing, unclear need, or low relevance.

Research More

Potentially interesting, but not enough information to decide yet.

 **Manager Tip:** Prioritization should improve focus, not create false certainty. Revisit classifications as new information surfaces.

AI Prompt — Prospect Prioritization Assistant

Copy and use this prompt to classify and rank your prospect list with AI assistance:

"Act as a sales prospecting analyst. Help me prioritize these prospects based on fit and likely relevance.

Our ICP: [paste ICP]

Our product/service: [describe product/service]

Prospect list: [paste account names and available notes]

For each prospect, assess:

01

Fit with ICP

02

Possible business need

03

Potential trigger signal

04

Buyer persona relevance

05

Priority level: High, Medium, Low, or Research More

06

Recommended next action

07

What additional research is needed

Rule: Do not invent facts. If information is missing, label it as 'needs research.'

Practice Activity — Prioritize 10 Prospects

Choose **10 prospects** from your territory, CRM, or sample list. Use AI to classify each one:

High Priority

Medium Priority

Low Priority

Research More

Then answer these reflection questions:

1. Which three should you work first?
2. Which should be deprioritized?
3. What information is missing?
4. What would change the priority?

Business Application: Create a simple prospect scoring note for your CRM to track and revisit your classifications.

Account Research That Supports Outreach

Good account research answers the questions that make outreach relevant and credible. **Separate facts from assumptions.**

Company Context

What does this company do? Who do they serve? What visible priorities may matter?

Urgency Signals

What recent changes may create urgency? What trigger events are visible?

Buyer Personas

Which buyer personas are relevant? What problem might be worth discussing?

Verify Before Using

What should I verify before using it? Label assumptions clearly in your brief.

 **AI Use:** Turn research notes into a structured account brief. Always separate facts from assumptions before outreach.

AI Prompt — Account Research Assistant

Copy and use this prompt to build a structured account brief from your research notes:

"Act as a B2B account research assistant. Analyze the account information below and prepare a prospecting research brief.

Company: [insert company name]

Product/service we sell: [insert product/service]

Target buyer persona: [insert buyer persona]

Research notes: [paste notes from approved sources]

The prompt will create:

01

Company summary

02

Relevant business priorities

03

Possible pain points

04

Potential buying triggers

05

Why this account may fit our ICP

06

What to verify before outreach

07

Three outreach angles + three discovery questions

08

One concise account insight for the salesperson

Important: Do not invent facts. Label assumptions clearly.

Contact Research That Respects the Buyer

Contact research should help you **understand the role**, not pretend you know the person personally.

✓ Useful Contact Research

Role responsibilities

Likely business outcomes

Common challenges

Decision influence

Relevant language

Possible questions to ask

✗ What to Avoid

Fake familiarity

Personal details that feel invasive

Unsupported assumptions

Overly casual messages based on weak information

AI Prompt — Contact Research Assistant

Copy and use this prompt to prepare for outreach to a specific contact:

```
"Act as a sales research assistant. Help me prepare  
for outreach to this contact.
```

```
Contact role: [insert role/title]
```

```
Company: [insert company]
```

```
Product/service: [insert product/service]
```

```
Known information: [paste available notes]
```

The prompt will create:

- 1 Likely responsibilities for this role
- 2 Business outcomes this person may care about
- 3 Possible challenges related to our solution
- 4 Messaging angle relevant to the role
- 5 Three respectful opening lines
- 6 Three discovery questions
- 7 Assumptions I should not state as facts

Writing Personalized Outreach with AI

Personalized outreach should connect a **verified insight** with a **likely business issue**, a **relevant reason to talk**, and a **clear, low-pressure next step**.

✓ The formula: **Verified insight + Likely business issue + Relevant reason to talk + Clear low-pressure next step**

AI Prompt — Personalized Email Writer

Copy and use this prompt to draft a concise, relevant prospecting email:

"Act as a professional B2B sales writing assistant. Draft a concise prospecting email using the information below.

My product/service: [insert]

Prospect role: [insert role/title]

Company: [insert company]

Relevant account insight: [insert verified insight]

Possible business challenge: [insert challenge]

Desired call to action: [insert CTA]

The prompt will produce:

01

Three subject line options

02

One email under 120 words

03

A slightly warmer version

04

A more direct version

05

A note explaining what makes the message relevant

Rules: Do not sound pushy. Do not exaggerate. Do not invent facts. Avoid fake familiarity.

AI Prompts — LinkedIn Outreach & Messaging Reviewer

LinkedIn Outreach Writer

"Act as a B2B LinkedIn outreach assistant. Write a connection message and follow-up message.

Prospect role: [insert role]

Company: [insert company]

Reason this person may be relevant: [insert reason]

Relevant insight: [insert verified insight]

Product/service: [insert product/service]

Creates:

- Connection request under 300 characters
- Follow-up message after connection
- Value-based question
- Conversational version
- Executive-level version

⊗ Avoid hype, pressure, and generic compliments.

Messaging Reviewer

"Act as a skeptical sales messaging reviewer. Review this message before I send it.

Message: [paste message]

Evaluates:

1. Is it relevant to the prospect?
2. Does it sound human?
3. Does it make unsupported assumptions?
4. Is the call to action clear?
5. What feels generic?
6. What should be removed?
7. How can it be improved?

Then provides a **revised version**.

Practice Activity — Rewrite Outreach

Start with a current or sample prospecting message and use AI to make it sharper, more relevant, and more human.

Use AI to:

 Identify generic language

 Check for unsupported claims

 Improve relevance

 Shorten the message

 Create a more natural version

Submit:

Original message

AI feedback

Revised message

One sentence explaining
what improved

"Would this message feel written for this prospect, or could it go to anyone?"

Sequences, Conversations, and Role-Play Practice

SECTION 3

Master the art of multi-touch prospecting, prepare for real prospect conversations, and sharpen your skills through AI-powered role-play and objection handling practice.

Building Multi-Touch Prospecting Sequences

SLIDE 27

A prospecting sequence is a **planned set of outreach attempts across channels**. Effective sequences respect the prospect's attention while building a compelling case for conversation over time.

Clear Reason

Every sequence starts with a specific, credible reason for reaching out — not a generic introduction.

Different Angles

Each touch approaches the conversation from a new perspective, adding context rather than repeating the same message.

Respect Attention

Keep each touch concise. Overloading the buyer with information is one of the fastest ways to lose them.

Low-Pressure CTAs

Calls to action should invite a response, not demand one. Make it easy for the prospect to say yes.

 AI Use: Generate structure, variation, and review points for your sequences.

Common Sequence Mistakes

SLIDE 28

Even well-intentioned sequences fail when they fall into predictable patterns. Avoid these common pitfalls that cause prospects to disengage.

What to Avoid

- Repeating "just checking in" with no new value
- Using the same value statement every single touch
- Overloading the buyer with information
- Escalating pressure too quickly
- Pretending urgency that does not exist
- Ignoring buyer role and account context

Better Sequence Design

Each touch should give the prospect a **new reason to consider the conversation**. Ask yourself before sending: what does this message add that the last one didn't?

If you can't answer "why now, why this angle," the touch isn't ready to send.

AI Prompt — Multi-Touch Sequence Builder

SLIDE 29

Use this prompt to generate a complete, professional prospecting sequence tailored to your specific audience and product.

1	2
Set the Context Fill in: Product/service, Target persona, Account type (ICP segment), Primary business problem, and a relevant verified insight.	Define Channels Specify available channels: email, phone, LinkedIn, voicemail. The AI will distribute touches appropriately across each.
3	4
Request 6 Touches Ask for: Channel, Timing, Purpose, Message angle, Draft message, Personalization field, and Call to action for each touch.	Apply the Rules Instruct the AI: Do not repeat the same message. Do not use aggressive language. Keep each touch concise.

```
"Act as a sales sequence strategist. Build a professional multi-touch prospecting sequence for this audience.  
  
Product/service: [insert] | Target persona: [insert] | Account type: [insert ICP segment]  
Primary business problem: [insert] | Relevant insight: [insert verified insight]  
Channels available: [email, phone, LinkedIn, voicemail]  
  
Create a 6-touch sequence with: Channel, Timing, Purpose, Message angle,  
Draft message, Personalization field, Call to action.  
  
Rules: Do not repeat the same message. No aggressive language. Keep each touch concise."
```

AI Prompt — Sequence Quality Reviewer

SLIDE 30

Once your sequence is drafted, use this prompt to evaluate and improve it before sending. Paste your full sequence and let AI act as a critical sales manager.

New Value Each Touch?

Does each message add something the previous one didn't?

Professional Tone?

Is the language respectful, confident, and non-aggressive throughout?

Credible Personalization?

Does the personalization feel genuine, or does it seem forced and generic?

Clear CTA?

Is the call to action specific, low-pressure, and easy to act on?

What to Remove?

Identify what should be shortened, cut, or rewritten for buyer focus.

Improved Version

The AI provides a revised sequence based on all feedback points.

Prompt instruction: "Act as a sales manager reviewing this prospecting sequence. Evaluate each dimension above, then provide an improved version."

Practice Activity — Build a 5-Touch Sequence

SLIDE 31

Build a complete sequence for one buyer persona using the AI prompts from the previous slides. Each touch must serve a distinct purpose.

1

Initial Email

Lead with a relevant insight or observation. Establish credibility and a clear reason for outreach.

2

LinkedIn Touch

A brief, personalized connection or message that reinforces your outreach without repeating the email.

3

Phone Opener or Voicemail

A concise, confident call that references your previous outreach and invites a brief conversation.

4

Value-Add Follow-Up

Share a relevant resource, insight, or case study that adds genuine value regardless of a reply.

5

Close-the-Loop Message

A respectful final touch that acknowledges timing and leaves the door open for future conversation.

Reflection: Do your follow-ups create new value, or simply remind the prospect that you already emailed?

Preparing for Prospect Conversations

SLIDE 32

Prospecting does not end when the prospect replies. The moment they engage, you need to be ready to carry the conversation forward with confidence and relevance.

Be Ready to Handle

- Explain why you reached out specifically
- Ask a relevant, well-researched opening question
- Respond to early resistance calmly
- Handle "send me information"
- Handle "not interested"
- Handle "we already have a vendor"
- Ask for a clear, specific next step

AI Use

Practice every one of these scenarios before the live conversation. Use AI role-play to rehearse your responses until they sound calm, natural, and confident — not scripted.

 Preparation is what separates a confident opener from a fumbled first impression.

Strong Discovery Openers

SLIDE 33

Your opener sets the tone for the entire conversation. A strong opener earns permission to continue — a weak one triggers immediate resistance.

What a Strong Opener Does

- Stays brief — under 20 seconds
- Shows relevant, specific context
- Avoids launching into a long pitch
- Creates permission for conversation
- Leads naturally to a useful question

Weak vs. Strong

Weak: *"I wanted to tell you about our platform."*

Stronger: *"I noticed your team appears to be expanding client delivery capacity. Many operations leaders at that stage are trying to keep project handoffs consistent. Is that a current focus for your team?"*

AI Prompt — Call Opener Coach

SLIDE 34

Use this prompt to generate multiple opener styles for the same prospect. Test which approach feels most natural and relevant for your specific situation.

→ 20-Second Phone Opener

A tight, timed opener that gets to the point immediately and earns the right to continue.

→ Permission-Based Opener

Explicitly asks for a moment of the prospect's time before making any statement about your product.

→ Direct Opener

States the reason for the call clearly and confidently without excessive preamble.

→ Consultative Opener

Leads with a relevant business observation and positions you as a peer, not a vendor.

→ Conversation-Inviting Question

One well-crafted question that opens dialogue and signals you've done your research.

📄 Prompt: "Act as a sales coach. Help me create a strong call opener. Provide all five formats. Keep it natural, concise, and professional."

Role-Play — AI as a Skeptical Prospect

SLIDE 35

Use AI to simulate a realistic, skeptical prospect before your live call. This builds confidence and exposes weaknesses in your approach before they cost you a real opportunity.

Set Up the Role-Play

Define: Prospect role, company context, likely concern, and your product/service. The more specific, the more realistic the simulation.

Run 3 Rounds

The AI starts skeptically. You respond. It continues the conversation for three realistic exchanges — no easy wins.

Receive Structured Feedback

After 3 rounds, AI scores you on: Clarity, Relevance, Confidence, Quality of questions asked, and one specific improvement.

"Make the conversation realistic but professional. After I respond, continue the role-play for 3 rounds. At the end, give me feedback."

Role-Play — AI as a Discovery Practice Partner

SLIDE 36

This prompt simulates a full discovery call with a realistic prospect who won't make it easy. Use it to sharpen your questioning, listening, and next-step skills.

How It Works

You define the prospect role, company type, and likely business issue. The AI plays the prospect — giving a brief opener response, asking realistic questions, and raising one objection during the conversation.

After 5 exchanges, the AI stops and scores you across five dimensions.

Scoring Dimensions

- **Opening Relevance**

Did your opener show genuine context and earn the right to continue?

- **Question Quality**

Were your questions insightful and business-focused?

- **Listening**

Did you respond to what the prospect actually said?

- **Business Focus**

Did you stay focused on their business problem, not your product?

- **Next-Step Clarity**

Did you close with a clear, specific next step?

✓ The AI also gives you one practice assignment to work on before your next role-play session.

Objection Handling with AI

SLIDE 37

Early objections are not rejections — they are signals. The way you respond in the first few seconds determines whether the conversation continues or ends.

Common Early Objections

"Not interested"

"Send me information"

"We already have a vendor"

"No budget"

"Bad timing"

"I'm too busy"

"How did you get my information?"

The Sales Principle

Do not argue with the objection. The three-step response:

1. **Acknowledge** — validate what they said without agreeing it's final
2. **Clarify** — understand what's really behind the objection
3. **Ask a useful question** — open the door to continued dialogue

 AI Use: Practice common objections until your response sounds calm and natural — not rehearsed.

Role-Play — AI as an Objection Coach

SLIDE 38

Use this prompt to practice any specific objection until your response is calm, credible, and buyer-centered. Run three rounds for maximum impact.

Round 1: Understand

1

AI explains what the prospect may really mean behind the stated objection
— the hidden concern beneath the surface.

2

Round 2: Role-Play

AI delivers the objection. You respond. AI gives feedback: what worked, what sounded defensive, and what question to ask next.

3

Round 3: Improve

AI provides a stronger version of your response. You practice again with the improved language until it sounds natural.

"Act as an objection-handling coach. Help me practice responding to this objection:
Objection: [insert] | Prospect role: [insert] | Product/service: [insert]

First, explain what the prospect may really mean. Then role-play the objection with me.
After I respond, give feedback using: What worked / What sounded defensive /
What question I should ask next / A stronger version of my response.
Continue for 3 rounds."

Practice Activity — Conversation Rehearsal

SLIDE 39

Complete three AI role-plays to build real conversational confidence. Save your work from each session to track your improvement over time.

Role-Play 1: Discovery Opener

Practice your call opener with a realistic prospect. Focus on relevance, brevity, and earning permission to continue.

Role-Play 2: "Not Interested"

Practice acknowledging, clarifying, and asking a useful question when the prospect shuts down immediately.

Role-Play 3: "Send Me Information"

Practice redirecting this common deflection into a genuine conversation about the prospect's actual situation.

For Each Role-Play, Save:

Your first response

AI feedback received

Your improved response

One phrase to reuse

Reflection: When prospects object, do you respond with more information — or do you ask a better question?

Measure, Improve, Scale, and Build the Toolkit

Section 4 — The final phase of your AI-powered prospecting journey: track what matters, scale with consistency, and build a reusable toolkit that works in the real world.

Measuring Prospecting Quality

Prospecting improvement requires tracking both **activity** and **quality** metrics — not just how much you do, but how well it works.

Activity Metrics

- Accounts researched
- Emails sent
- Calls made
- LinkedIn messages sent
- Follow-ups completed

Quality & Outcome Metrics

- Reply rate
- Positive reply rate
- Meeting conversion
- Account fit quality
- Personalization quality
- Discovery call quality
- Objection response improvement

AI Use: Analyze patterns across your metrics and suggest targeted improvements to your workflow.

AI Prompt — Prospecting Performance Reviewer

SLIDE 41

COPY & USE

Use this prompt to get a structured coaching review of your prospecting results:

"Act as a sales performance coach. Analyze my prospecting results and suggest improvements.

Goal: [insert goal] | **Prospecting activity:** [paste activity data] | **Outcomes:** [paste outcome data] | **Sample messages:** [paste 2–5 messages] | **Target audience:** [insert ICP/persona]

1	What's Working Identify patterns in successful outreach
2	What's Hurting Surface what may be reducing performance
3	Specificity Check Are messages specific enough to resonate?
4	Personalization Gaps Where can personalization improve?
5	Next Tests What should you experiment with next?
6	Coaching + Workflow 3 recommendations + 1 revised weekly workflow

 Do not overstate conclusions if the data is limited.

Scaling Without Losing Quality

The goal is **not** to make every seller sound identical. The goal is to create a **consistent workflow** that still allows human judgment to shine through.

Standardize Across the Team

- ICP criteria
- Research brief format
- Required prompts
- Review checklist
- Quality standards
- Manager coaching rhythm

Customize Per Seller & Account

- Buyer insight
- Account context
- Message angle
- Discovery questions
- Conversation style

AI Prompt — Team Workflow Standardizer

SLIDE 43

COPY & USE

Use this prompt to build a repeatable, AI-supported prospecting workflow for your entire team:

"Act as a sales enablement strategist. Help us create a repeatable AI-supported prospecting workflow for our team. **Team:** [insert team type] | **Target audience:** [insert ICP/persona] | **Current challenges:** [insert challenges]"

01

Standard Workflow Steps

Define the repeatable sequence every rep follows

03

Quality Standards & Coaching Moments

Set the bar and build in manager touchpoints

02

Required Prompts & Review Checkpoints

Lock in the AI prompts and quality gates

04

Metrics, Mistakes & Weekly Rhythm

Track what matters and avoid common pitfalls

Final Project Overview

Build Your AI Prospecting Toolkit

Your toolkit is a **reusable set of prompts, checklists, and workflow steps** you can apply directly to your real prospecting process — not a one-time exercise.

Define Better-Fit Prospects

Sharpen your ICP criteria

Research Accounts Faster

Structured research briefs

Qualify Opportunities

Score and prioritize prospects

Write Relevant Outreach

Personalized emails and messages

Practice Conversations

Role-play with AI coaching

Build a Repeatable Workflow

Consistent, scalable process

Final Output: A reusable set of prompts, checklists, and workflow steps you can use in your real prospecting process.

Toolkit Component 1 — ICP Prompt

 COMPONENT 1 OF 8

Include this prompt in your toolkit to define and refine your ideal customer profile:

"Act as a sales strategist. Help me create an ideal customer profile for prospecting. **Product/service:** [insert] | **Best-fit customers:** [insert known details] | **Poor-fit customers:** [insert known details] | **Target market:** [insert]"

ICP Summary High-level profile overview	Firmographic Criteria Size, industry, geography	Pain Indicators Business pain signals to look for	Buying Triggers Events that create urgency
Disqualification Signals Red flags to walk away from	Buyer Personas Best-fit roles and titles	Prospecting Filters Criteria to narrow your list	Fit Verification Questions Questions to confirm fit early

Toolkit Component 2 – Account Research Prompt

🔍 COMPONENT 2 OF 8

Use this prompt to generate a structured research brief before reaching out to any account:

"Act as a B2B account research assistant. Create a prospecting research brief. **Company:** [insert] | **Product/service:** [insert] | **Target persona:** [insert] | **Research notes:** [paste approved research]"

1 Company Summary

Overview of the account and its business context

2 Business Priorities & Pain Points

Relevant priorities and possible challenges they face

3 Buying Triggers & ICP Fit

Events that may create urgency and how well they match your ICP

4 Outreach Angles & Discovery Questions

Angles to lead with and questions to explore in conversation

5 Facts to Verify

Assumptions that need confirmation before outreach

Do not invent facts. Label assumptions clearly.

Toolkit Component 3 — Prospect Qualification Prompt

COMPONENT 3 OF 8

Use this prompt to evaluate whether a prospect is worth prioritizing before investing time in outreach:

"Act as a sales qualification coach. Evaluate whether this prospect is worth prioritizing. **ICP:** [paste ICP] | **Prospect information:** [paste notes]"

Fit Level

Matches Ideal Customer Profile?

Possible Need

Evidence of Pain or Challenge?

Role Relevance

Is this the Right Buyer?

Timing Signals

Urgency Indicators?

Potential Value

Deal Size/Strategic Fit?

Missing Information

Any Information Gaps to Fill?

Disqualification Risks

Identify Red Flags Early?

Recommended Priority

High, Medium, Low Priority?

Explain your reasoning clearly — don't just assign a score without context.

Toolkit Component 4 — Email & LinkedIn Prompts

✉ COMPONENT 4 OF 8

Personalized Email Prompt

"Act as a B2B sales writing assistant. Write a concise personalized email for [prospect role] at [company] using this verified insight: [insert]. Keep it under 120 words, avoid hype, and include a low-pressure CTA."

- Under 120 words
- Avoid hype and unsupported claims
- Low-pressure call to action
- Grounded in verified insight

LinkedIn Outreach Prompt

"Act as a LinkedIn outreach assistant. Write a connection request under 300 characters and one follow-up message for [prospect role]. Use this relevant insight: [insert]. Avoid generic compliments and pressure."

- Connection request under 300 characters
- One follow-up message included
- No generic compliments
- No pressure tactics

Toolkit Component 5 — Call Opener Prompt

📞 COMPONENT 5 OF 8

Use this prompt to prepare multiple strong call openers before picking up the phone:

"Act as a sales coach. Help me create a strong call opener. **Prospect role:** [insert] | **Company context:** [insert] | **Reason for outreach:** [insert] | **Product/service:** [insert]"

20-Second Phone Opener

Crisp, confident, and to the point — gets attention fast

Permission-Based Opener

Asks for a moment before diving in — respectful and disarming

Direct Opener

States the reason for the call clearly and without hesitation

Consultative Opener

Leads with a relevant question or observation about their business

Conversation Starter Question

One question that invites dialogue and keeps the call going

✅ Keep it natural and professional — the best opener is one you can deliver confidently.

Toolkit Component 6 — Objection Role-Play Prompt

🛡 COMPONENT 6 OF 8

Use this prompt to practice handling objections before they happen in real conversations:

"Act as a skeptical prospect and objection-handling coach. **Prospect role:** [insert] | **Company context:** [insert] | **Objection:** [insert] | **Product/service:** [insert] — Role-play the objection with me. After I respond, give feedback."

→ What Worked

Identify the strongest parts of your response

→ What Sounded Defensive

Flag language that may have put the prospect off

→ Question Quality

Did you ask a good question to understand the objection?

→ How to Improve

Specific coaching on what to do differently

→ Stronger Response Version

A revised, more effective version of your reply

📌 Continue for 3 rounds to build real muscle memory.

Toolkit Component 7 — Follow-Up Sequence Prompt

🔄 COMPONENT 7 OF 8

Use this prompt to build a structured multi-touch follow-up sequence that avoids repetitive "just checking in" language:

"Act as a sales sequence strategist. Build a multi-touch follow-up sequence. **Product/service:** [insert] | **Target persona:** [insert] | **Account context:** [insert] | **Initial outreach message:** [paste] | **Channels:** [email, phone, LinkedIn]"

Toolkit Component 8 — Message Quality Checklist

COMPONENT 8 OF 8

Before sending any AI-assisted outreach, run through this checklist. Every "no" is an opportunity to improve before hitting send.

- ☐ Is it specific to this prospect?
- ☐ Is it relevant to the buyer's situation?
- ☐ Is it credible and grounded in facts?
- ☐ Does it avoid unsupported claims?
- ☐ Is it concise — under 120 words for email?
- ☐ Does it sound human, not robotic?
- ☐ Is the CTA clear and low-pressure?
- ☐ Does it avoid pressure or urgency tactics?
- ☐ Would this feel written for this specific prospect?
- ☐ Did I verify all the facts before sending?

 **AI Practice:** Ask AI to score the message against this checklist, then revise it yourself before sending. The final judgment is always yours.

Final Project Instructions

SLIDE 53

Build and submit your complete **AI Prospecting Toolkit**. Each component should be ready to use in your real prospecting process — not just a template exercise.

Weekly Toolkit Reflection

Success Checklist & Closing Thought

By the End of This Course, You Should Be Able To:

- Research accounts faster
- Create more personalized outreach
- Improve prospect prioritization
- Practice prospect conversations with AI
- Build a repeatable AI-supported workflow
- Reduce generic outreach
- Improve message relevance
- Use AI without replacing human judgment

Better Prospecting Comes From:

Clear Targeting

Know exactly who you're going after and why

Relevant Research

Understand the account before you reach out

Human Judgment

AI assists — you decide

Consistent Follow-Up

Persistence with purpose, not pressure

AI is your workflow partner. You are still responsible for the relationship.

- ✓ **Final Reflection:** What is one prospecting habit you will change this week?
